

Studi kasus Perulangan

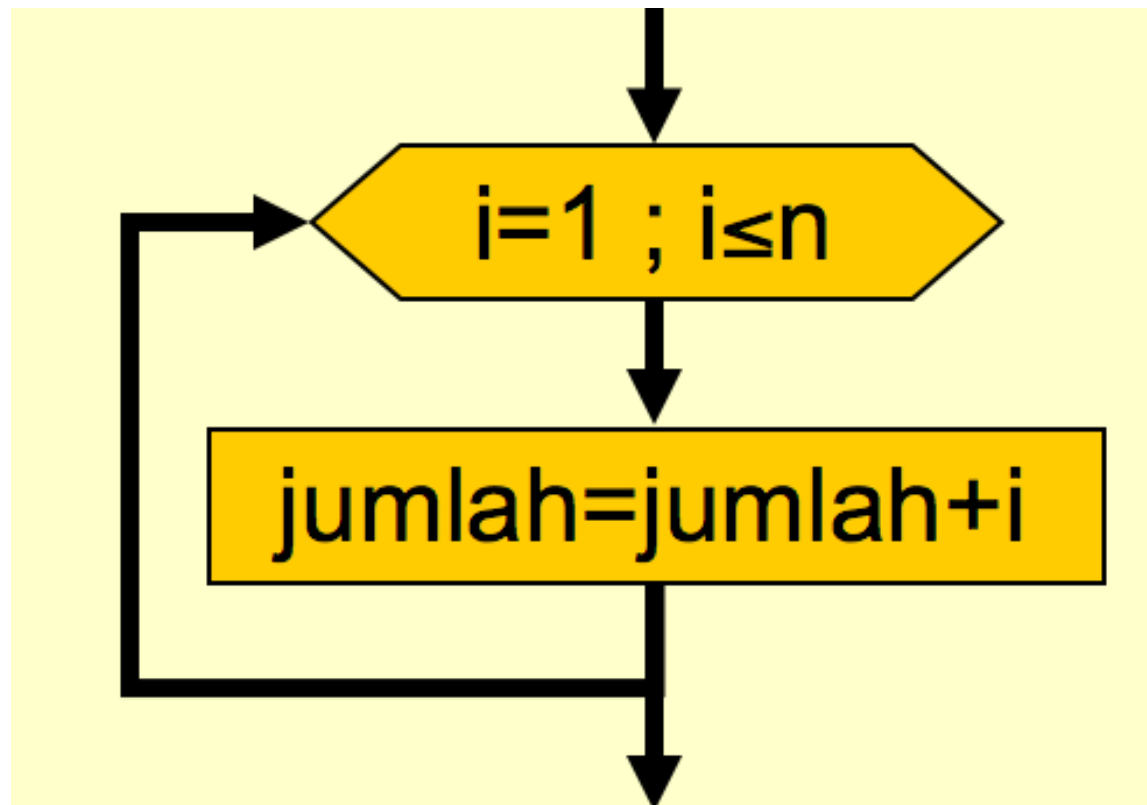

Ali Ridho Barakbah

Tipe Perulangan

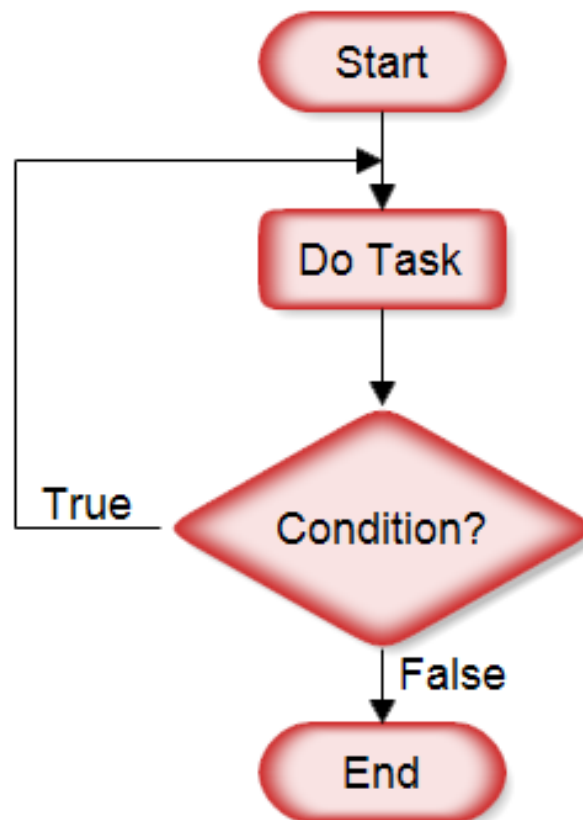

- For
- Do while
- While
- Nested

For

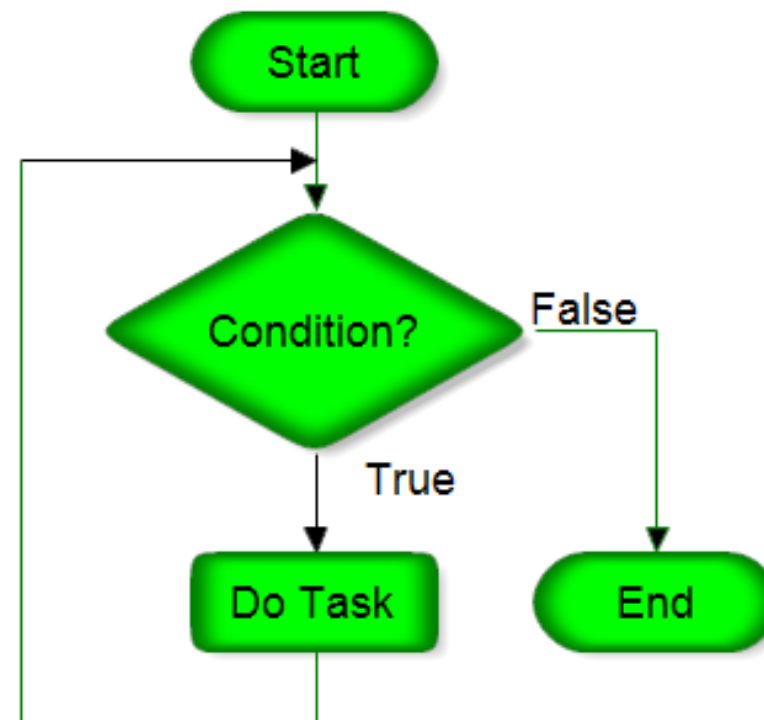

While

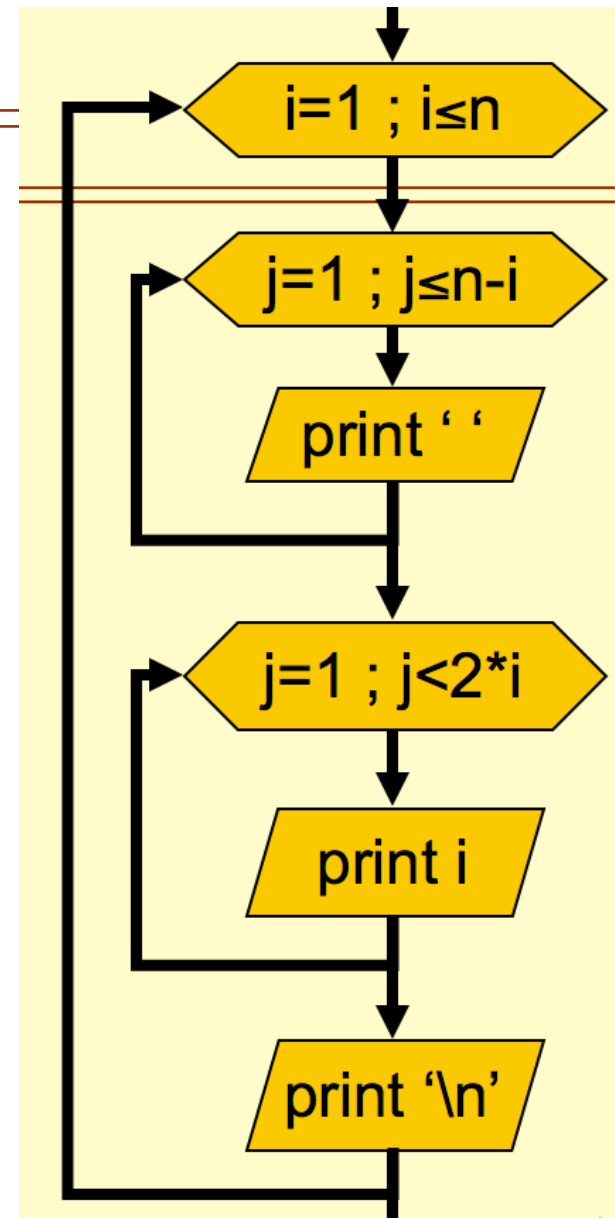

Do While Loop

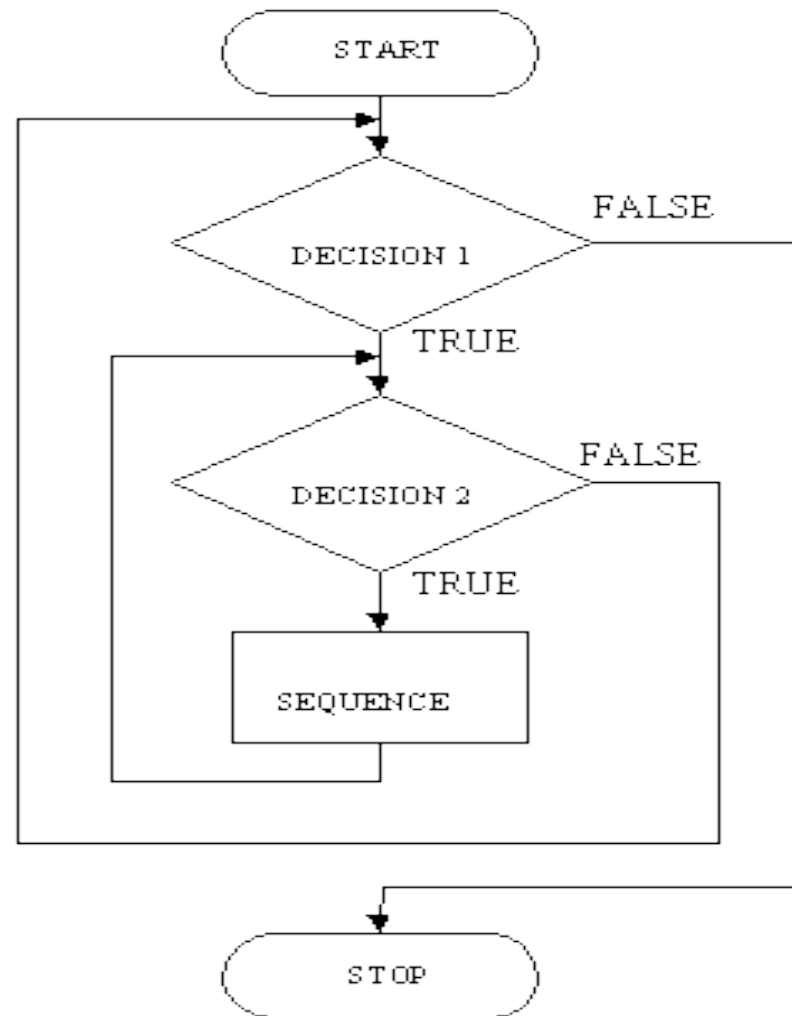

While Loop

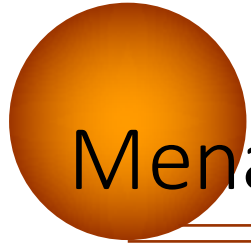

Nested

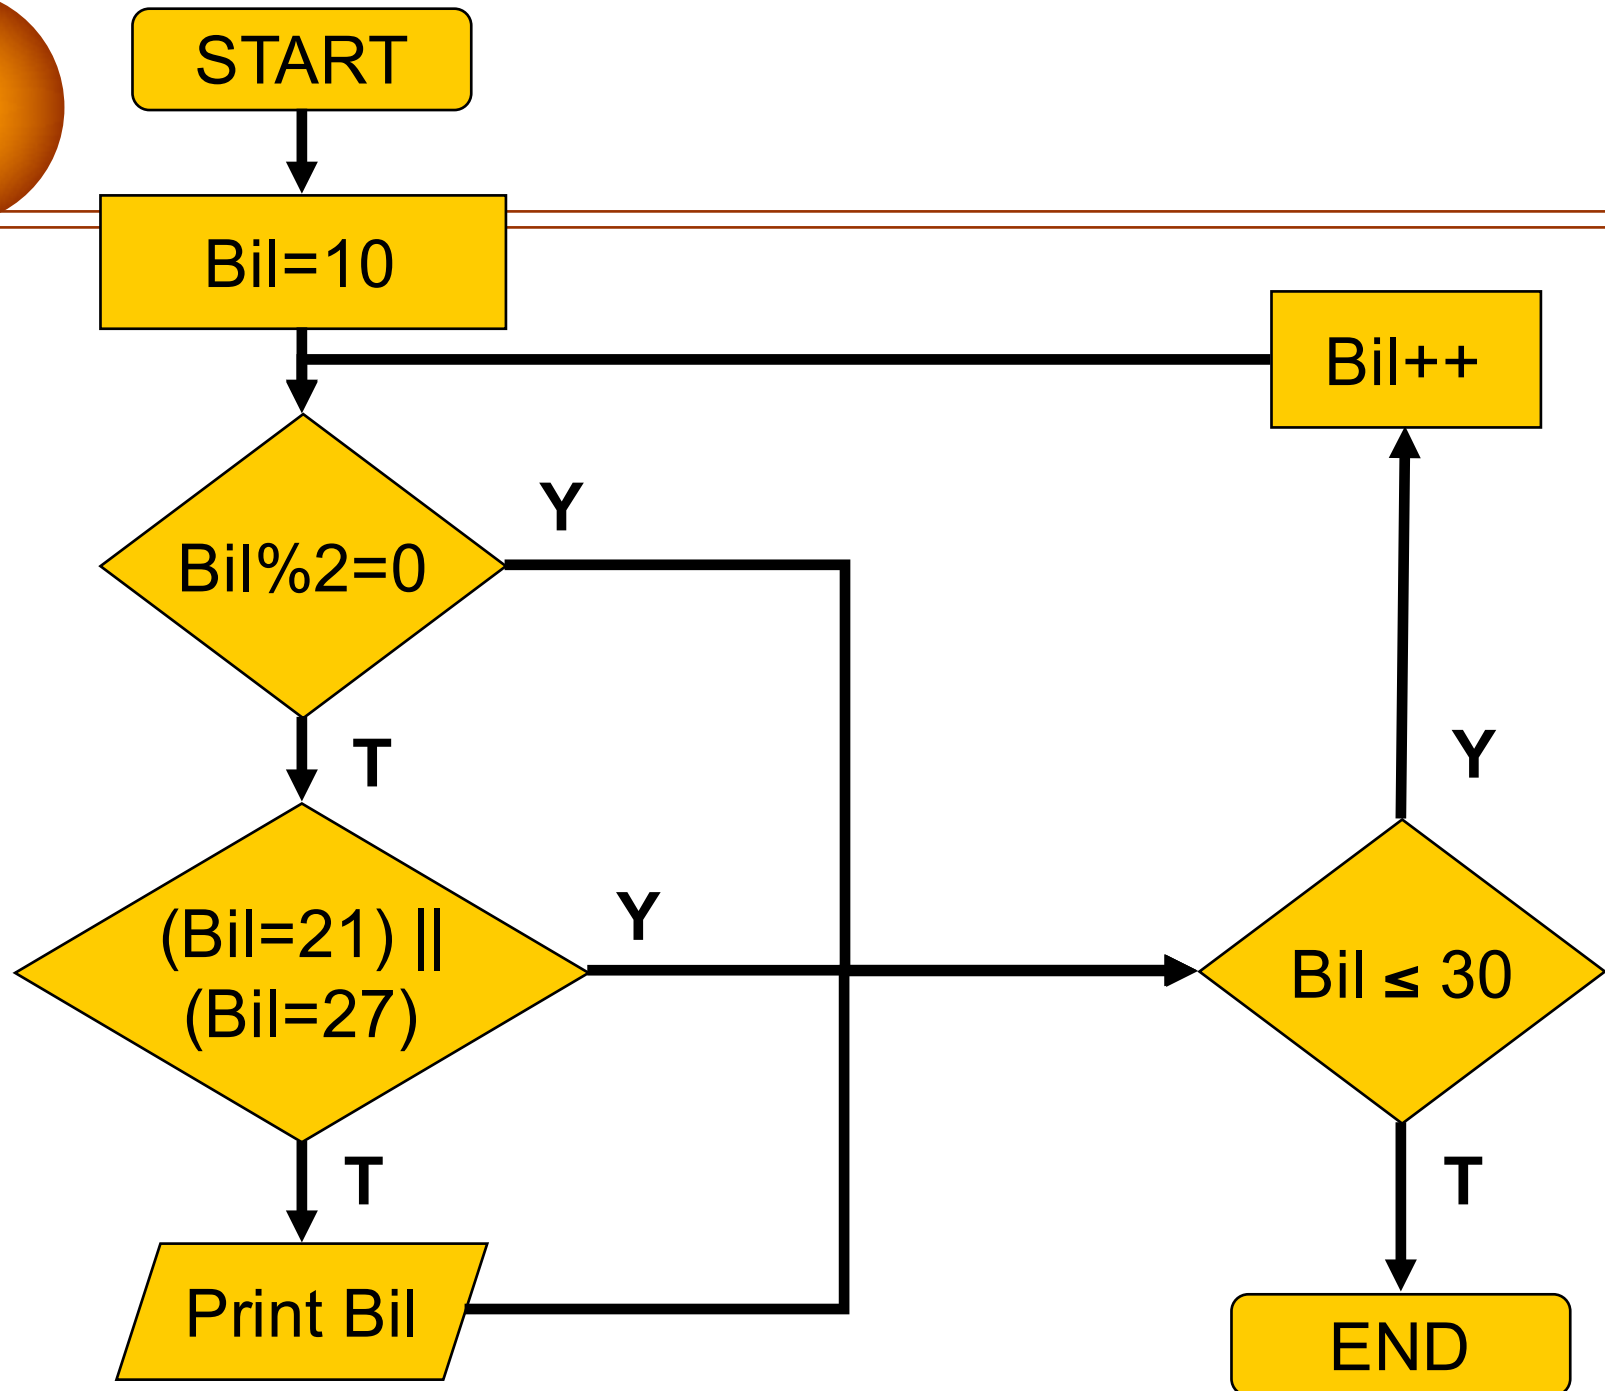

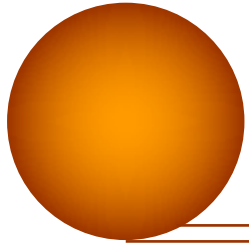

Nested While

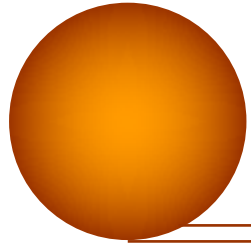

Menampilkan bilangan ganjil

- Buatlah flowchart untuk menampilkan sederetan bilangan ganjil dari 10 sampai 30 kecuali 21 dan 27
- Contoh:
 - Output : 11 13 15 17 19 23 25 29

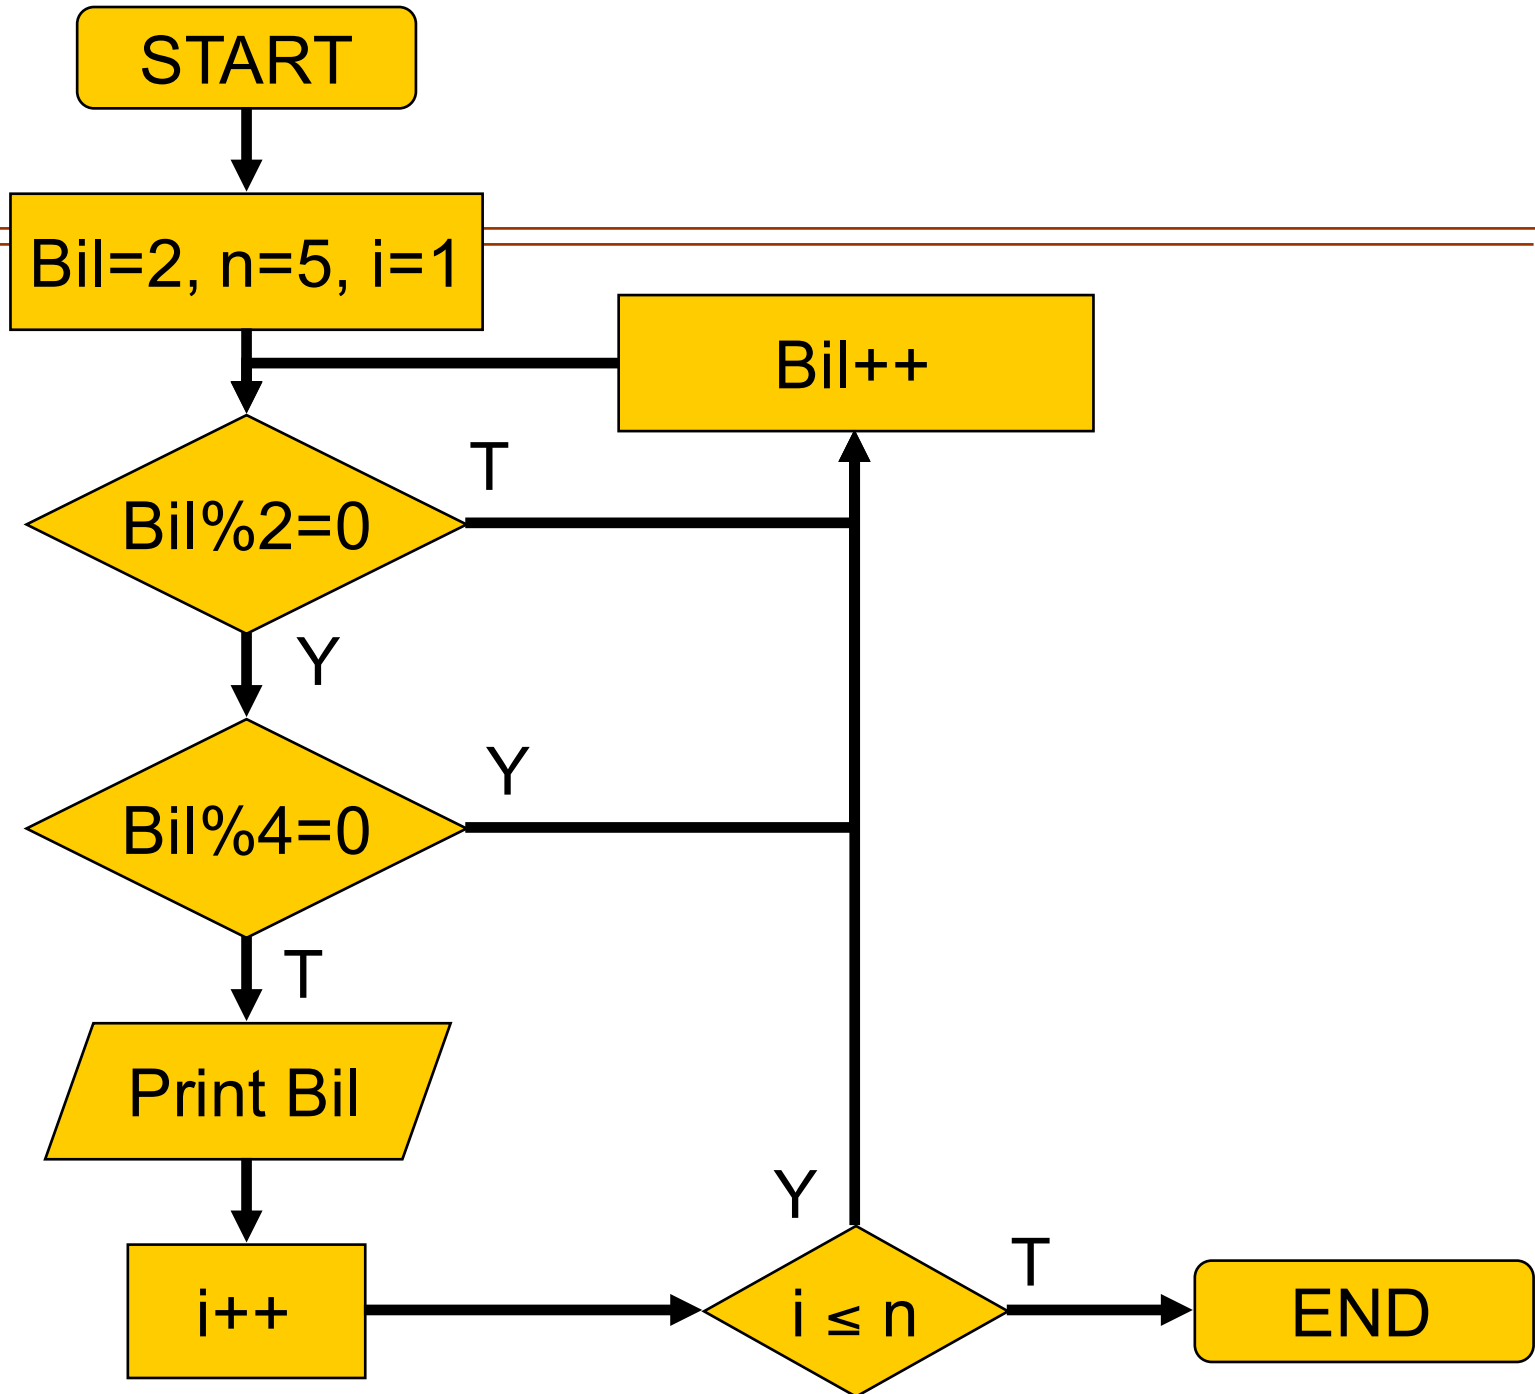

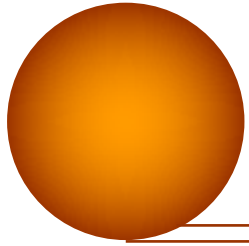

Menampilkan n deret bilangan genap kecuali kelipatan 4

Program yang dapat menampilkan bilangan genap dari 2 sampai n deret kecuali bilangan genap tersebut kelipatan 4.

Contoh:

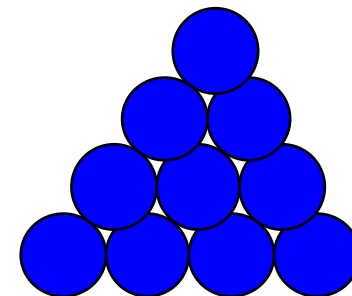

input n : 5

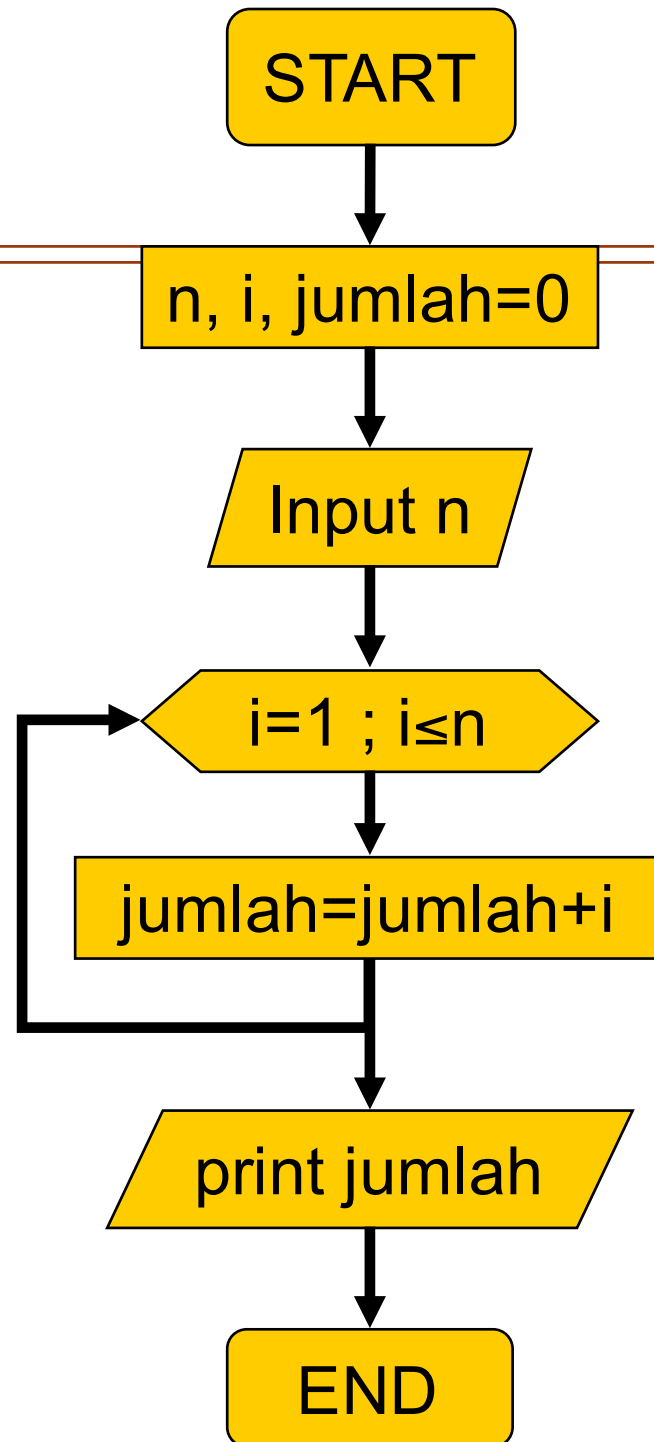

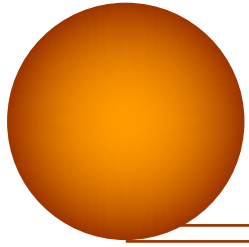

output : 2, 6, 10, 14, 18

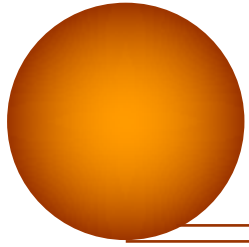

Triangular

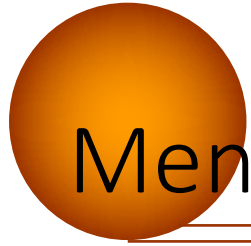

- Triangular adalah suatu susunan benda (bola) yang disusun sedemikian sehingga menyerupai segitiga. Dengan mengetahui jumlah bola yang paling bawah, maka dapat dihitung jumlah seluruh bola yang menyusun triangular tersebut.
- Buatlah flowchart untuk menghitung jumlah bola dalam suatu triangular
- Contoh:
 - Masukkan jumlah triangular = 4
 - Jumlah bola = 10

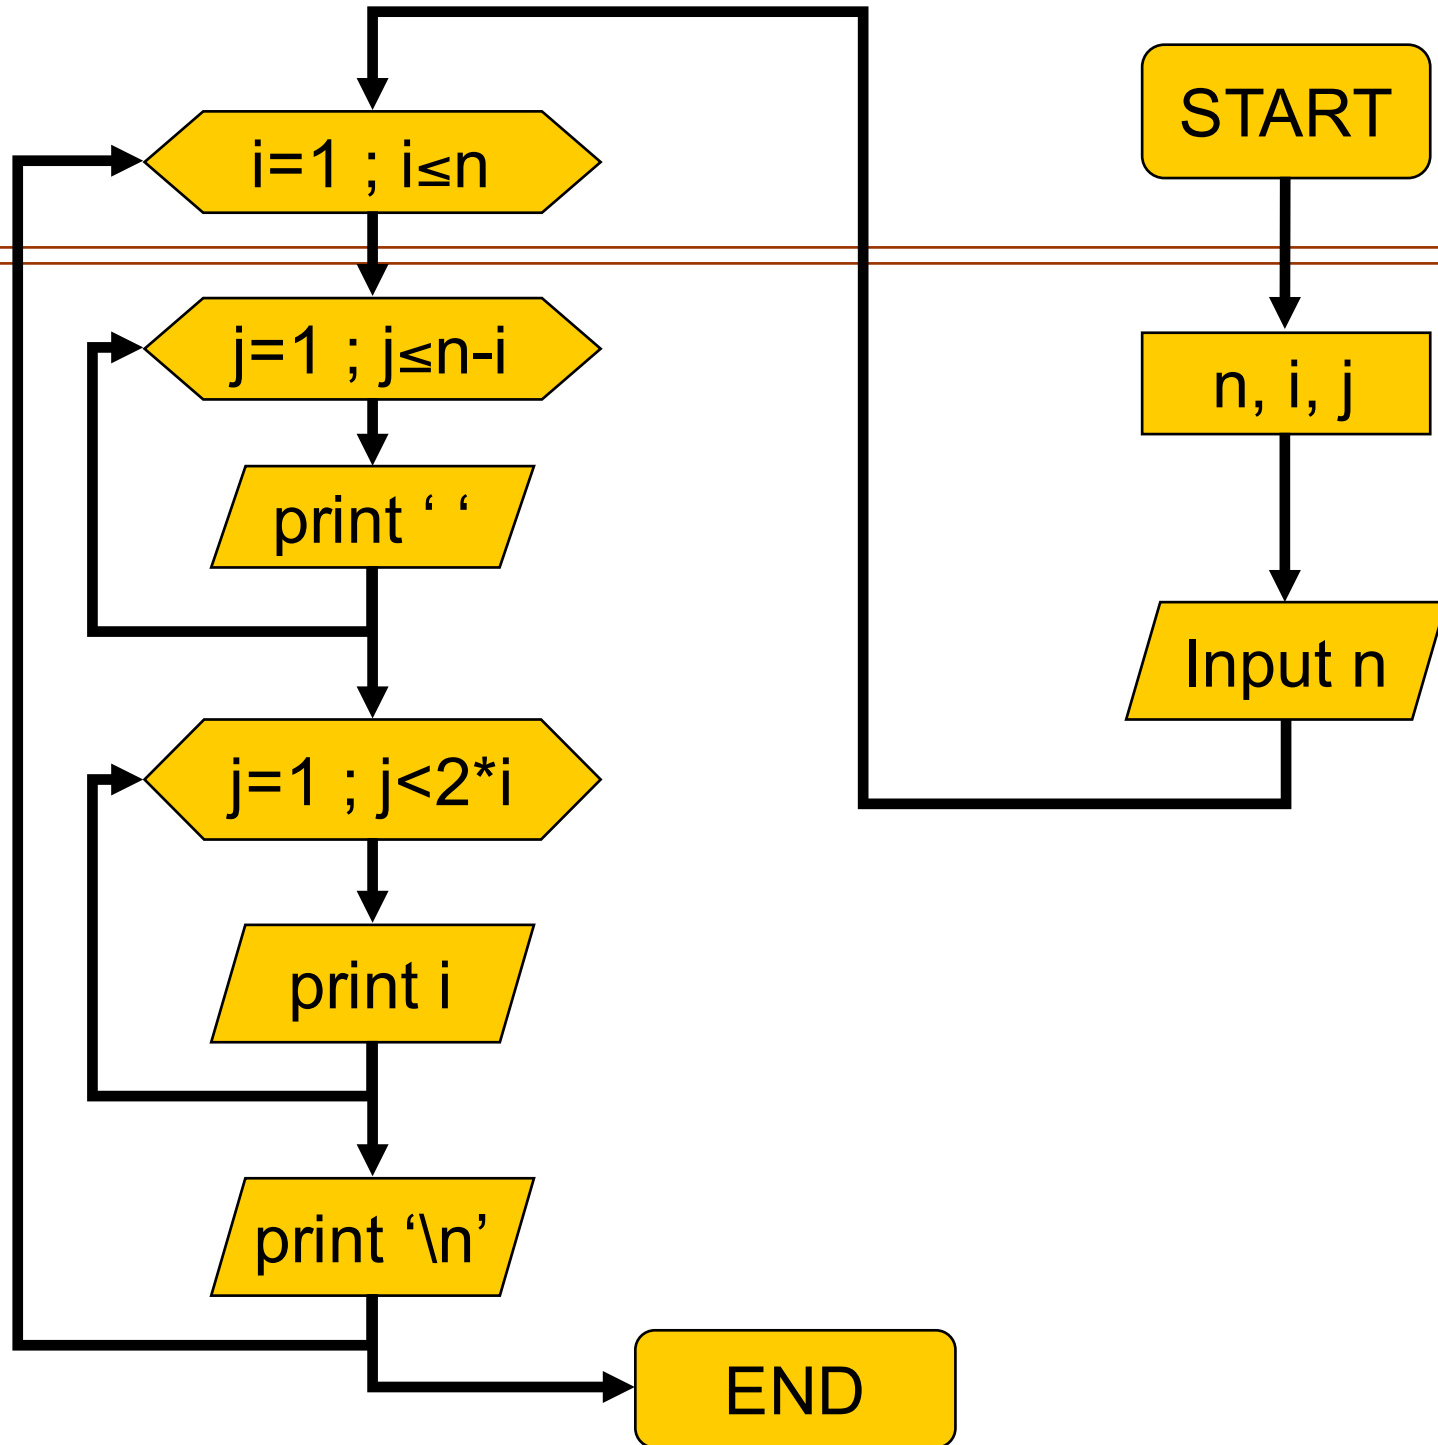

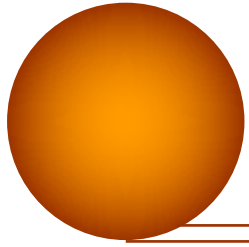

Perulangan Bersarang

Menampilkan tumpukan bilangan

- Buatlah flowchart untuk menampilkan tumpukan bilangan
- Contoh:
 - Masukkan maksimum bilangan = 5
 - Output :

1
222
33333
4444444
555555555

Soal 1

```
MASUKKAN N <MAKS = 20> : 5
111111111
 2222222
   33333
    444
     5
```

Soal 2

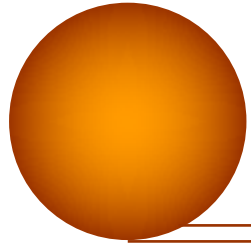

MASUKKAN N (MAKS = 20) : 8

Soal 3

N : 10

Soal 4

1

1

3

6

10

15

21
